and Industry of Serbia

XVI International Mineral Processing & Recycling Conference

INTERNATIONAL MINERAL PROCESSING & RECYCLING CONFERENCE

Proceedings

Editors:
Zoran ŠTIRBANOVIĆ
Milan TRUMIĆ

28-30 May 2025
Belgrade, Serbia

University of Belgrade,
Technical Faculty in Bor

Chamber of Commerce
and Industry of Serbia

XVI International Mineral Processing & Recycling Conference

Proceedings

Editors:
Zoran ŠTIRBANOVIĆ
Milan TRUMIĆ

28 – 30 May 2025, Belgrade, Serbia

XVI International Mineral Processing & Recycling Conference

PUBLISHER:

University of Belgrade, Technical Faculty in Bor

FOR THE PUBLISHER:

Dean: Prof. Dr Dejan Tanikić, University of Belgrade, Technical Faculty in Bor

EDITORS:

Prof. Dr Zoran Štirbanović, University of Belgrade, Technical Faculty in Bor

Prof. Dr Milan Trumić, University of Belgrade, Technical Faculty in Bor

TECHNICAL EDITORS:

Dr Vladimir Nikolić, University of Belgrade, Technical Faculty in Bor

MSc Dragana Marilović, University of Belgrade, Technical Faculty in Bor

MSc Katarina Balanović, University of Belgrade, Technical Faculty in Bor

PROCEEDINGS COVER DESIGN:

MSc Aleksandar Cvetković, University of Belgrade, Technical Faculty in Bor

PRINTED BY:

Grafika Galeb, Niš, Serbia

Printed: 200 copies

PUBLISHING LICENCE:

All papers in the Proceedings are published under CC-BY licence.

PUBLICATION YEAR:

2025

Prof. Dr Vesna Alivojvodić, The Academy of Applied Studies Polytechnic, Belgrade (Serbia)
Dr Saied Karimi, Hamedan University of Technology (Iran)
Dr Mathilde Perrin, University of Grenoble Alpes, CEA-Liten (France)
Dr Aleksandar Janković, Hatch (Australia)
Dr Vladan Milošević, University of Belgrade, Technical Faculty in Bor (Serbia)
Prof. Dr Milan Antonijević, University of Belgrade, Technical Faculty in Bor (Serbia)
Dr Sonja Milićević, Institute for Technology of Nuclear and Other Mineral Raw Materials (Serbia)
Prof. Dr Milan Gorgievski, University of Belgrade, Technical Faculty in Bor (Serbia)
Prof. Dr Dragan Manasijević, University of Belgrade, Technical Faculty in Bor (Serbia)
Prof. Dr Semra Kurama, Eskişehir Technical University (Turkey)
Dr Aleksandra Mitovski, Engineering Dobersek GmbH (Germany)
Prof. Dr Carmen Mihaela Neculita, Research Institute on Mines and Environment, University of Québec in Abitibi-Témiscamingue (Canada)
Dr Janine Rodrigues Figueiredo, Federal University of Ouro Preto, (Brazil)
Prof. Dr Ana Radojević, University of Belgrade, Technical Faculty in Bor (Serbia)
Dr Jelena Jordanović, University of Belgrade, Technical Faculty in Bor (Serbia)
Prof. Dr Komnitsas Konstantinos, Technical University of Crete (Greece)
Dr Jelena Avdalović, Institute of Chemistry, Technology and Metallurgy (Serbia)
Dr Milica Mladenović, Vinča Institute of Nuclear Sciences (Serbia)
Prof. Dr Xiaomin Ma, Taiyuan University of Technology (China)
Prof. Dr Snežana Urošević, University of Belgrade, Technical Faculty in Bor (Serbia)
Prof. Dr Milan Radovanović, University of Belgrade, Technical Faculty in Bor (Serbia)
Prof. Dr Ana Simonović, University of Belgrade, Technical Faculty in Bor (Serbia)
Prof. Dr Francesco Ferella, University of L'Aquila (Italy)
Prof. Dr Fatma Arslan, Istanbul Technical University (Turkey)
Prof. Dr Gülay Bulut, Istanbul Technical University (Turkey)
Dr Samah S. Abdallah, Central Metallurgical Research and Development Institute (Egypt)
Prof. Dr. Vesna Grekulović, University of Belgrade, Technical Faculty in Bor (Serbia)
Dr. Vandana Kumari Jha, KTH Royal Institute of Technology (Sweden)
Dr Vesna Krstić, Mining and Metallurgy Institute Bor (Serbia)
Dr Sanja Petrović, Mining and Metallurgy Institute Bor (Serbia)
Dr Goran Pačkovski, Mining and Metallurgy Institute Bor (Serbia)
Dr Ivana Jovanović, Mining and Metallurgy Institute Bor (Serbia)
Prof. Dr Tanja Kalinović, University of Belgrade, Technical Faculty in Bor (Serbia)
Dr Jelena Kalinović, University of Belgrade, Technical Faculty in Bor (Serbia)
Dr Predrag Stolić, University of Belgrade, Technical Faculty in Bor (Serbia)

TABLE OF CONTENTS

PLENARY LECTURES	1
Pablo R. Brito-Parada	3
A MINERAL'S JOURNEY – UNRAVELLING FLOTATION PHENOMENA THROUGH PARTICLE TRACKING	
Srečko Stopic, Duško Kostić, Mitar Perušić, Richard Schneider, Bernd Friedrich	9
RECOVERY OF VALUABLE METALS FROM BAUXITE RESIDUE (BR) USING DECARBONIZING TECHNOLOGIES	
Corby G. Anderson	19
HOW THE RARE EARTHS BECAME THE LANTHANIDES AGAIN	
Junbeum Kim	21
EMERGING TECHNOLOGIES AND EMERGING WASTES: CHALLENGES AND OPPORTUNITIES	
INVITED LECTURES	23
Aleksandar Nikoloski, Pritam Singh, Tina Chanda Phiri	25
AN OVERVIEW OF GLOBAL COPPER SMELTING SLAG PRODUCTION AND REPROCESSING APPROACHES	
Maria Sinche-Gonzalez	37
EDUCATION IN MINERAL PROCESSING AND FILLING THE GAP OF TALENTED MINERAL PROCESSING ENGINEERS	
Predrag Umičević, Ivica Karoglan, Gregor Radišić, Viktor Simončič	44
INNOVATIVE BIODEGRADABLE WASTE TREATMENT AS A POSSIBLE SOLUTION FOR RECULTIVATION OF TAILINGS AND SLAG LANDFILLS	
Kerstin Forsberg	50
CRYSTALLIZATION CHALLENGES IN HYDROMETALLURGY	
Belinda McFadzean, Avuyile Wali, Megan Becker, Stefan Geldenhuys	55
CRITICAL MINERALS: CHALLENGES AND OPPORTUNITIES IN PLATINUM GROUP MINERAL FLOTATION	
Alexandre Chagnes, Pierric Hubert, Safi Jradi	62
INNOVATIVE STRATEGIES FOR METAL RECOVERY FROM LFP-NMC LITHIUM-ION BATTERY BLENDS	
Michal Šyc, Jiří Hykš	66
FROM LINEAR TO CIRCULAR ECONOMY – STORY OF THE BOTTOM ASH	
Przemysław B. Kowalczyk	70
CRITICAL RAW MATERIALS (CRM) RECOVERY FROM NORWEGIAN DEPOSITS: CHALLENGES AND OPPORTUNITIES	

SESSION LECTURES	73
Massoud Aghamirian Vu Truong, Kristina Muntu, Jean-Gabriel Fraboulet, Sean Salour, Brian Kawenski Cook INVESTIGATIONS INTO LITHIUM MINERALS PROCESSING	75
Héctor Muñiz Sierra, Michal Šyc, Ayse Asya Arslanturk THE APPLICATION OF PHYSICAL CONCENTRATION TECHNOLOGIES IN THE RECYCLING OF NEW WASTE STREAMS	86
METALS YOUNG RESEARCHER AWARD	89
Diego Poblete, Claudio Leiva, Maria Sinche-Gonzales, Claudio Acuña HOLLOW DROP BUBBLES A PROPOSED NEW TECHNOLOGY FOR OPTIMIZED METAL EXTRACTION VALIDATED IN THE LABORATORY	91
Wanjia Zhang, Zhitao Feng, Zhiyong Gao PREDICTION OF COLLECTOR FLOTATION PERFORMANCE BASED ON MACHINE LEARNING AND QUANTUM CHEMISTRY: A CASE OF SULFIDE MINERALS	98
Helir Muñoz, Sophia Korili, Antonio Gil SYNTHESIS OF MOF@ALUMINUM SALINE SLAG COMPOSITES FOR CO ₂ CAPTURE AS A NEW STRATEGY OF VALORIZATION OF SECONDARY ALUMINUM WASTES	106
Jernej Imperl, Mitja Kolar, Vilma Ducman, Gorazd Žibret, Lea Žibret SELECTIVE SEPERATION OF MAGNESIUM FROM SLOVENIAN DOLOMITES	113
Vladan Nedelkovski, Dragana Medić, Aleksandar Cvetković, Sonja Stanković, Žaklina Tasić, Milan Radovanović, Snežana Milić ANODE NANOMATERIAL RECOVERED FROM SPENT BATTERIES FOR PEROXIDE-ASSISTED CRYSTAL VIOLET PHOTOCATALYTIC DEGRADATION	119
Dragana Marilović, Sonja Stanković, Grozdanka Bogdanović EFFECT OF TEMPERATURE ON THE LEACHING COPPER FROM FLOTATION TAILINGS WITH IONIC LIQUID	125
PAPERS	131
Iyiola Olatunji Otunniyi, Oluwayimika Olasunkanmi Oluokun CLEAN GOLD SOLUTION FROM PRINTED CIRCUIT BOARD PHYSICAL PROCESSING DUST BY SELECTIVE COMPLEXATION	133
Ugur Ulusoy Fırat Burat, Guler Bayar, Behrad Mojtahedi, Gulsah Guven CHARACTERIZATION AND COMPARISON OF THE PARTICLE SHAPE OF MICRONIZED GRAPHITE GROUND IN DIFFERENT MILLS USING DIA	142
Aleksander Sokolov, Edvins Letko, Vitalijs Kuzmovs, Ulises Miranda Ordonez ON-LINE XRF ANALYSIS OF ELEMENTS IN MINERALS ON A CONVEYOR BELT	148
Aleksandra Mitrovic, Jelena Vucicevic LABORATORY-SCALE REACTORS EMPLOYING MOVING BED BIOFILM REACTOR (MBBR) TECHNOLOGY: A COMPREHENSIVE REVIEW	154

Vesna Marjanović, Emina Požega, Miomir Mikić, Milutin Stojadinović INCREASING RECYCLING RATES IN THE FIELD OF CONSTRUCTION AND DEMOLITION WASTE MANAGEMENT BY IMPLEMENTING THE LEGAL ACT OF THE REPUBLIC OF SERBIA AND THE EUROPEAN UNION	160
Radmila Marković, Vesna Marjanović, Aleksandra Ivanović, Milutin Stojadinović CHARACTERISTICS OF COPPER POWDER OBTAINED AT LOWER VALUES OF CATHODE CURRENT DENSITY	166
Messai Ali, Berrekbia Linda, Meramria Ikram, Juan M. Menéndez-Aguado, Begoña Fernández Pérez, Vladimir Nikolić, Milan Trumić, Boustila Amir POTENTIAL OF USING ZINC PROCESSING TAILINGS (ZPT's) IN THE PRODUCTION OF BURNT CLAY BRICKS	171
Aleksandra Božić, Dominik Brkić, Marina Stamenović, Marija Miletić DETERMINATION OF PCB CONCENTRATION IN SOIL	179
Stefan Milanović, Nikola Simić, Lazar Kričak, Milanka Negovanović, Miljan Gomilanović, Nikola Đokić ENVIRONMENTAL IMPACT WITH THE GREENHOUSE GASES AND AIR POLLUTANT PREDICTION BY DRILLING AND BLASTING WORKS	184
Dragan Milošević, Jasmina Nešković, Pavle Stjepanović, Svetlana Polavder LANDFILL FOR COMBUSTION PRODUCTS FROM THE KOSTOLAC THERMOELECTRON	190
Fatma Arslan, Gülay Bulut EVALUATION OF MINERAL PROCESSING AND METALLURGICAL PLANTS WASTES	196
Abhishek Gupta, Tom Newman, Frank Hrach BENEFICIATION OF MINERAL ORES USING TRIBO-ELECTROSTATIC SEPARATOR	202
Valentin Alexeyevich Chanturia, Valeriy Valentinovich Morozov, Galina Petrovna Dvoichenkova, Elena Leonidovna Chanturia THE SELECTION OF APPLICATION MODES OF AGENTS MODIFYING DIAMOND SPECTRAL CHARACTERISTICS IN THE PROCESS OF X-RAY LUMINESCENCE SEPARATION	208
Valeriy Valentinovich Morozov, Galina Petrovna Dvoichenkova, Irina Vasilyevna Pestryak, Valentina Anatolyevna Chut-Dy UP-TO-DATE METHODS AND TECHNOLOGIES FOR IMPROVING THE PERFORMANCE OF FOAM SEPARATION OF DIAMOND-BEARING KIMBERLITES	214
Plamen Georgiev, Marina Nicolova, Irena Spasova, Mihail Iliev, Ralitsa Ilieva NON-FERROUS METALS BIOLEACHING FROM PYROMETALLURGY COPPER SLAG USING SPENT MEDIUM OF DIFFERENT FUNGAL SPECIES	220
Milica Zdravković, Vesna Grekulović, Edina Huseinović, Robert Vianello, Nada Štrbac, Melita Huremović, Milan Gorgievski UV-VIS IDENTIFICATION OF COPPER COMPLEXES WITH INHIBITOR ORGANIC COMPONENTS IN THE ELECTROLYTE	226

Moloud Nazeri, Maria Sinche-Gonzalez, Emad Abkhoshk DISSOLUTION KINETICS OF LOW-GRADE ZINC SILICATE ORE IN HYDROXIDE SOLUTION	232
Ivana Smičiklas, Mihajlo Jović, Jelena Amidžić, Snežana Dragović EVALUATION OF WASTE MATERIALS FOR CADMIUM REMOVAL: COMPARATIVE STUDY OF SORPTION CAPACITY AND STABILITY	238
Tanja Kalinović, Ana Radojević, Jelena Kalinović, Jelena Jordanović, Snežana Šerbula CASE STUDY ON METAL(LOID)S DISTRIBUTION IN LINDEN TREE PARTS, IN AREAS WITH HIGHT ENVIRONMENTAL POLLUTION	244
Branimir Farkaš, Ana Hrastov, Iva Štefičar POSSIBILITY OF INSTALLATION OF SOLAR POWER PLANTS IN EXPLOITATION SITES	250
Marija Simić, Marija Kovačević, Katarina Stojanović, Branislava Savić Rosić, Dragana Vasić Anićijević, Tanja Brdarić, Danka Aćimović ELECTROCHEMICAL OXIDATION OF BISPHENOL S WITH SnO ₂ -MWCNT ELECTRODES	256
Marija Simić, Marija Kovačević, Katarina Stojanović, Marija Ječmenica Dučić, Dragana Vasić Anićijević, Danka Aćimović, Tanja Brdarić COMPARATIVE STUDY OF ELECTROCHEMICAL DEGRADATION OF RHODAMINE B USING GLASSY CARBON, STAINLESS STEEL, AND NICKEL ELECTRODES	261
Marija Kovačević, Marija Simić, Katarina Stojanović, Danka Aćimović, Sanja Živković, Tanja Brdarić, Dragana Vasić Anićijević PHOTODEGRADATION OF CIPROFLOXACIN WITH COPER-MODIFIED TITANIUM(IV)-OXIDE	267
Francielle Câmara Nogueira, Carlos Alberto Pereira, Leandro Vinícius Alves Gurgel, Stephânia da Consolação Silva Nogueira, Iranildes Daniel Santos PROCESS WATER REUSE IN IRON ORE FLOTATION: REDUCING AMINE CONSUMPTION	273
Jovica Sokolović, Ivana Đolović, Dejan Tanikić, Zoran Štirbanović, Ivana Ilić THE EFFECT OF PARTICLE SIZE ON THE FLOTATION KINETICS OF RAW AND WASTE COAL	279
Zuzana Danková, Alexandra Bekényiová, Zuzana Kollová, Erika Fedorová, Pavel Bačo, Jaroslav Briančin SLOVAK DOLOMITE AS A RAW MATERIAL SOURCE FOR METAL MAGNESIUM PRODUCTION	286
Fatma Arslan, Cüneyt Arslan RECYCLING OF WASTE CELL PHONES	292
Fulya Mennik, Nazlım İlkyaz Dinç, Beril Tanç Kaya, Fırat Burat THE RECYCLING OF PLASTICS AND METALS FROM END-OF-LIFE NMC-TYPE ELECTRIC VEHICLE LITHIUM-ION BATTERIES USING SELECTIVE FROTH FLOTATION	298

Paul Delaney	306
PERFORMANCE OF IRON ALUMINIUM AND COPPER IRON BIMETALLIC PARTICLES IN REMOVAL OF HEAVY METALS AND METALLOIDS	
Samah S. Abdallah, Samah M. El-Sayed, Mohamed A. Abdel-Khalek	313
SELECTIVE BIO-FLOCCULATION OF HEMATITE MINERAL USING BACILLUS SUBTILIS FOR PHOSPHOROUS REMOVAL FROM IRON ORES	
Patrycja S. Bednarek, Nima Razavi, Przemyslaw B. Kowalczuk	320
THE ROLE OF ADDITIVE MANUFACTURING IN MINERAL AND METAL EXTRACTION	
Zeynep Üçerler Çamur, Tülay Türk, Murat Olgaç Kangal	327
INVESTIGATION OF SURFACE PROPERTIES OF PVC FOR SELECTIVE RECOVERY	
Martin Straka	333
ELECTROCHEMISTRY OF INDIUM IN METHYL-TRIOCTYLAMMONIUM BIS(TRIFLUOROMETHYLSULFONYL)IMIDE IONIC LIQUID	
Seyed Hamzeh Amiri, Maria Sinche-Gonzalez	340
GRADE IMPROVEMENT OF IRON ORE CONCENTRATE BY APPLYING PLANT AUDITS, STANDARDIZATION AND PROCESS OPTIMIZATION	
Henrique Dias Gatti Turrer, Josue Mesquita De Souza Junior, Gillian Nikka Omega, Juliette Laine, Marcello Rodrigues Cruz, Nubia Bottosso, Vinicius Seerig	347
ADVANCEMENTS IN MINERAL PROCESSING: COLLABORATIVE EFFORTS AND TECHNOLOGICAL INNOVATIONS AT ARCELORMITTAL	
Zuzana Kollová, Pavel Bačo, Zuzana Danková, Zoltán Németh	353
THE POTENTIAL SOURCES OF CRITICAL RAW MATERIALS IN SLOVAKIA	
Amalia Andreas, Titus Nghipulile, Godfrey Dzinomwa	359
SELF-FLOTATION OF GALENA IN A COMPLEX SULPHIDE ORE FROM A COPPER MINE IN NAMIBIA	
Janine Rodrigues Figueiredo, Érica Linhares Reis, Arthur Silva de Oliveira	368
PROCESSING OF FINE LITHIUM MINERAL TAILINGS	
Theodor Steller, Stefan Eisert, Bernd G. Lottermoser	375
EXPLORING ELECTROHYDRAULIC FRAGMENTATION FOR PROCESSING ELECTRIC ARC FURNACE SLAGS	
Yergeshev Akim Ruslanovich, Tokpayev Rustam Rishatovich, Khavaza Tamina Narimanovna, Karmeyeva Marina, Naurzybayev Mikhail Kasymovich, Ignatkina Vladislava Anatolyevna	381
REFRACTORY POLYMETALLIC ORES BY FLOTATION. DIRECTIONS FOR IMPROVING METALLURGICAL BALANCE	
Valentine A. Chanturia, Igor Zh. Bunin, Maria Ryazantseva	389
THE USE OF DIELECTRIC BARRIER DISCHARGE TO REGULATE THE TECHNOLOGICAL PROPERTIES OF CHALCOPYRITE AND SPHALERITE	

Luis Verdugo, Barbara Etschmann, Maryam Abdus-Salam, Andrew Hoadley, Jorge Menacho, Joel Brugger MECHANOCHEMICAL LEACHING OF CHALCOPYRITE IN LOW MOISTURE CONDITIONS	395
Miomir Mikić, Milenko Jovanović, Radmilo Rajković, Daniel Kržanović, Sandra Milutinović RECOLTIVATION PROCEDURE OF FLOTATION TAILINGS AT THE LOCATION OF RTH IN BOR	401
Vandana Kumari Jha, Christophe Duwig, Samaneh Teimouri, Kerstin Forsberg METAL RECOVERY FROM SPENT BATTERIES THROUGH ANTISOLVENT CRYSTALLIZATION IN A T-MIXER USING A COUPLED CFD-PBE APPROACH	407
Luka Ceyskens, Nina Miladinović, Giuseppe Granata, Tom Van Gerven MECHANOCHEMICAL ACTIVATION OF ARGON OXYGEN DECARBURIZATION SLAGS FOR IMPROVED MINERAL CARBONATION	413
Miomir Mikić, Vesna Marjanović, Emina Požega, Radmilo Rajković TREATMENT OF ACIDIC MINE WATERS BY THE NEUTRALIZATION PROCESS	416
Julio Valenzuela Elgueta, Silvia Ahualli Yapur, Angel Vicente Delgado Mora INFLUENCE OF CATIONIC SURFACTANTS ON THE ELECTROKINETIC PROPERTIES AND STABILITY OF SILICA-KAOLINITE SUSPENSIONS UNDER COPPER HYDROMETALLURGY CONDITIONS	422
Dragana Medić, Maja Nujkić, Žaklina Tasić, Vladan Nedelkovski, Stefan Đorđievski, Slađana Alagić, Snežana Milić CHARACTERIZATION OF ELECTRODE MATERIALS FROM SPENT BATTERIES IN THE PROCESS OF RECOVERING VALUABLE METALS	429
Stefan Đorđievski, Dragana Adamović, Miloš Đukić, Ana Petrović, Jelena Petrović, Zoran Štirbanović IMPROVEMENT OF BOR RIVER WATER QUALITY THROUGH TREATMENT AND RECIRCULATION OF MINING AND METALLURGICAL WASTEWATER	435
Kristina Pavićević, Danica Jovašević, Maja Rajković, Ivana Jelić, Marija Janković, Marija Šljivić-Ivanović BIOCHAR IN WASTEWATER REMEDIATION: A BRIEF REVIEW OF CHARACTERISTICS AND PREPARATION MATERIALS	441
Semra Kurama, Hüseyin Boğaç Poyraz, Zahide Bayer Öztürk A PROPOSAL FOR ZERO WASTE IN THE IRON AND STEEL INDUSTRY: ZIRCONIA NOZZLE WASTE EVALUATION	449
Boris Borche Fidanchev, Afrodita Zendelska NEW SAG-BALL MILL AND FLOTATION LINE FOR RECONSTRUCTING OF "ZLETOVO" FLOTATION PLANT-PROBISHTIP, NORTH MACEDONIA	457
Nela Vujović, Vesna Alivojvodić, Dragana Radovanović, Marija Štulović, Miroslav Sokić, Filip Kokalj POTENTIAL OF RECYCLING AND REUSE MINING WASTE IN SERBIA: CHALLENGES AND PROSPECTS	463

Haldun Kurama DISSOLVED AIR FLOTATION: IS IT REALLY A SUITABLE SOLUTION FOR INDUSTRIAL PURIFICATION PROCESSES?	469
Carmen M. Neculita, Flavia L. Braghiroli VALORIZATION OF RESIDUAL MATERIALS IN THE PREVENTION AND TREATMENT OF CONTAMINATED MINE WATER AND AIR	476
Vladimir Topalović, Ana Vujošević, Anja Antanasković, Veljko Savić, Marija Djošić, Zorica Lopičić, Jelena Nikolić CHEMICAL STABILITY AND FERTILIZER EFFICIENCY OF BIOGLASS AND BIOCHAR ON ROSE PLANTINGS	483
Vladimir Topalović, Veljko Savić, Marija Djošić, Danijela Smiljanić, Snežana Zildžović, Snežana Grujić, Jelena Nikolić THE EFFECT OF FLUXING AGENT CATIONS IN FLY ASH-BASED GLASS ON CHEMICAL STABILITY	490

ABSTRACT – In this paper, the use of artificial neural networks in the flotation process is presented and analyzed. Apart from utilization of flotation in the mineral processing, deinking flotation is used for separation of ink particles from the cellulose fibers. The time of deinking flotation, pH value, reagents such as oleic acid, oleic acid with CaCl_2 , oleic acid with AlCl_3 as well as concentration of reagents were used as input for the network. The recovery of toner particles in froth was used as output data for the network. The neural network demonstrated high correlation coefficients during training (0.97), validation (0.96), and testing (0.94), and subsequent accuracy testing confirmed these results.

Keywords: Artificial neural networks, Machine learning, Flotation, Deinking.

INTRODUCTION

One of the fastest-developing fields in computer science in recent decades is artificial intelligence [1]. Artificial intelligence is a branch of computer science focused on developing programs that enable machines to think and behave in ways that could be considered intelligent. Intelligent thinking represents the ability to reason in accordance with a current, previously unknown situation [2].

Machine learning is a field of artificial intelligence that deals with the development of programs that learn from previously obtained data. Once a solution to a problem is found, the program can remember and apply it in a similar situation. The forms of machine learning can be divided into the following three basic types of learning: supervised learning, unsupervised learning, and reinforced learning [3].

Supervised learning represents an approach to the learning problem in which the learning program receives a set of input data (x_1, x_2, \dots, x_n) and a set of desired output values, such that for each input data point x_i , there is a corresponding correct output y_i . The task of the program is to learn how to assign the correct output value to a new input data point. Algorithms based on supervised learning include models based on artificial neural networks, decision trees, support vector machines, Gaussian processes, and others [3].

Artificial Neural Network (ANN) represents a set of interconnected simple processing elements (neurons) whose operating principle is based on the biological neuron. A typical neural network architecture consists of three layers of neurons: input, hidden and output layers [2,3].

The optimal number of hidden neurons depends on multiple factors, including the number of inputs and outputs, number of training pairs, level of noise in the training pairs, complexity of the error function, network architecture, and training algorithm. It can be said that the choice of architecture depends on the type and complexity of the problem being studied. The optimal number of neurons in the hidden layer is very important for the correct functioning of the model. A network with too many neurons will have an excessive number of parameters, making it prone to overfitting. Conversely, a network with too few neurons will not be able to properly approximate the given nonlinear relationships, leading to a problem of underfitting [3].

The flotation process has been used in mineral processing plants to separate valuable minerals from the gangue. This process takes place in a specific environment – flotation pulp – which consists of three phases: solid (mineral particles), liquid (water) and gaseous (air). Separation of mineral particles is made possible due to the differences in their surface hydrophobicity (feature of material characterizing its ability to be wetted with a liquid in the presence of a gas phase) [4].

Compared to mineral flotation, deinking flotation (ink removal from cellulose fibers) is a relatively young process. The basis of deinking flotation is pulp that contains the following components: water, as the carrier medium (approximately 98-99%); fibers, material obtained as a clean fraction (1-2%); fillers (<0.6%), printing ink and other impurities (<0.15%) that need to be removed; and reagents required for the fiber purification process (<0.1%) [5].

The efficiency of the flotation process can be shown through the toner recovery in foam product and cellulose fiber recovery in sink product, effective residual ink concentration in the final product (ERIC), the whiteness and brightness of the fibers.

The main parameters that influence flotation are temperature, pH, toner particle size, air flow, water hardness (concentration of calcium ions in the water), and others. All parameters are interdependent, so the flotation process is defined exclusively by their interaction-i.e., by the mechanism of their combined effect [6,7].

Our understanding of the fundamental physical and chemical processes underlying the deinking processes is growing. But, due to the great variability of the raw material as well as the complexity of the physical processes which occur at the microscopic level, processing problems and process instability remain as challenges [8].

Several studies demonstrate the effectiveness of artificial neural networks in modeling and optimizing processes in the pulp and paper industry. Labidi et al. (2007) [9] used an ANN to model ink removal in flotation, finding that higher consistency and airflow rates improved brightness and ERIC in the flotation cell, with strong correlation between ANN predictions and experimental results. Additionally, ANNs have been applied in image analysis, Verikas et al., (2000) [10] employed an ANN, combined with Fuzzy Logic to analyse the colour of dark spots in recycled paper sheets. Pauck (2011) [8] generated nearly 500 deinking runs to form the database for the training neural

networks. The models effectively predicted brightness and ERIC, though yield results were slightly less accurate due to process complexity.

In the following study, an algorithm with supervised learning was analyzed, specifically, a model based on artificial neural networks for data obtained by deinking flotation.

EXPERIMENTAL

The Neural Fitting tool from the Matlab software package was used to create and train the network, as well as to evaluate its performance accuracy using mean squared error (MSE) and regression analysis.

The time of deinking flotation (in the range 1-20 min), pH value (in the range 3-12), reagents such as oleic acid, oleic acid with CaCl_2 , oleic acid with AlCl_3 as well as concentration of reagents (0.1 kg/t, 0.4 kg/t, 1 kg/t) were used as input model variables. The recovery of toner particles in froth was used as the output model parameters.

From the total dataset of 225 parameters, 200 (88.89%) were randomly allocated for network training, validation, and testing, while the remaining 25 (11.11%) were reserved for evaluating the trained network's accuracy.

RESULTS AND DISCUSSION

The neural network architecture consisted of 10 hidden neurons (Fig. 1). From the available dataset of 200 parameters, 140 (70%) were used for training, while 30 parameters each (15%) were allocated for validation and testing (Table 1, Fig. 2). Network training was performed using the Levenberg-Marquardt algorithm.

Figure 1 The structure of the created artificial neural network

Table 1 Network performance accuracy criteria obtained using the Levenberg-Marquardt algorithm

Training algorithm		Number of data	Mean squared error (MSE)	Coefficient of correlation (R)
Levenberg-Marquardt	Training	140 (70%)	74.87510	0.977055
	Validation	30 (15%)	192.94061	0.960261
	Testing	30 (15%)	136.83548	0.942087

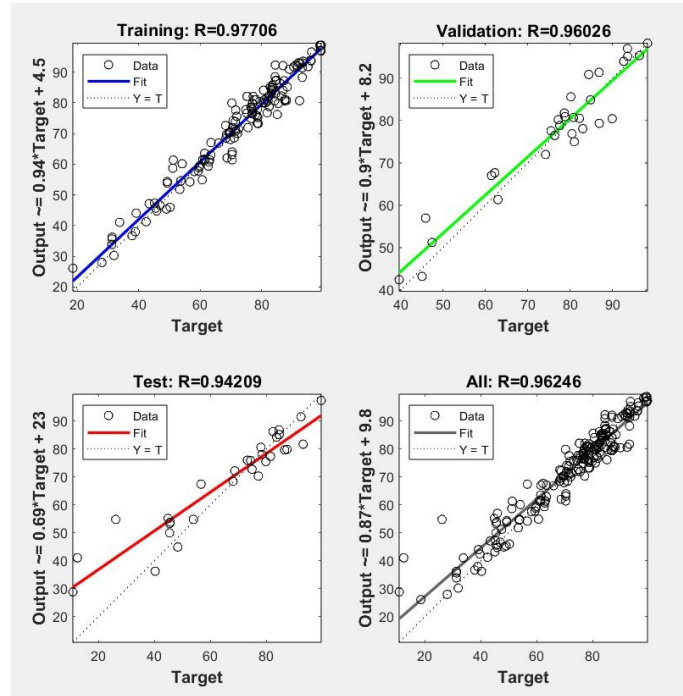

Figure 2 Plot of network's target values versus predicted outputs based on trained parameters, using the Levenberg-Marquardt training algorithm

Testing of the model demonstrates that the neural network achieves good results, as shown by a correlation coefficient of 0.94209. The excellent agreement between experimental data and ANN outputs, evidenced through both graphical representation and quantitative correlation analysis, validates the model's satisfactory prediction accuracy.

Since 88.89% of the data (200 parameters) were used for training, validation, and testing in the previous part, the remaining 11.11% (25 data points) that were not used for model training were preserved for prediction purposes, in order to determine the model's accuracy. The following Fig 3 present graphical comparisons between the values obtained from the network and the actual values obtained experimentally.

Figure 3 shows that the network modeling was successfully implemented, with the neural network accurately capturing the trend of experimental result curves.

Based on these results, it can be concluded that the artificial neural network architecture, comprising an input layer, a single 10-neuron hidden layer, and an output layer, is effectively applicable to this dataset type.

The number of required neurons was supposed to be determined by iteration. The greater the number of neurons, the more complex is the function which can be approximated. On the other hand, more neurons require more data which can also lead to overfitting of a function. At this point the training information and the neural network can be saved and inputted with other real data to produce a predicted output. If the

performance of the network is not adequate, several corrective measures are available [8]: the network can be reset or initialized with new initial weights and biases and retrained; the number of neurons can be increased or decreased; expand the training dataset; change the number of input values; the ratio of data in training, validation and test sets can be changed; try alternate learning and training algorithms, and pre-processing of inputs and outputs.

Figure 3 Comparative values obtained experimentally and using the ANN model with the Levenberg-Marquardt training algorithm

CONCLUSION

In this study, an algorithm with supervised learning was analyzed, specifically an artificial neural network model for data obtained by deinking flotation.

The neural network architecture consisted of a single hidden layer with 10 neurons. Network training was performed using the Levenberg-Marquardt algorithm.

The inputs of the models were time of deinking flotation, pH, reagents such as oleic acid, oleic acid with CaCl_2 , oleic acid with AlCl_3 as well as concentration of reagents, while the output values were recovery of toner particles in froth.

The neural network demonstrated high correlation coefficients during training (0.97), validation (0.96), and testing (0.94). Subsequent accuracy testing confirmed these results, showing that the network effectively modeled laboratory processes with strong correlation.

Based on these results, it can be concluded that the artificial neural network architecture, comprising an input layer, a single 10-neuron hidden layer, and an output layer, is effectively applicable to this dataset type.

Since this study employed 10 hidden neurons in the neural network architecture, determining and utilizing the optimal number of neurons for this specific dataset could potentially yield even better results.
